Narcissus, Golden Spur.

VAUGHAN'S NARCISSUS

These beautiful flowers are becoming more popular every year on account of their easy culture, hardiness and freedom of bloom. Easily grown both in and out of doors, splendid for naturalizing, coming up year after year and multiplying very rapidly, so that a hundred bulbs planted in soil suitable for their development can be dug up and divided into twice that number three or four years after being planted. We offer on this page Trumpet varieties only, which we find give the best satisfaction.

Single Trumpet Daffodils

Prices on single bulbs include postage; the dozen and 100 rates are by express at purchasers' expense

EMPEROR

A magnificent sort. The entire flower is a rich yellow: trumpet of immense size and petals of the perianth so broad that they overlap. Three of these bulbs planted in a 6-inch pot will make a splendid show. First size bulbs, 10 cts. each, 60 cts. per doz., \$3.50 per 100, \$30 per 1,000; mammoth bulbs, 15 cts. each, \$1 per doz., \$6 per 100.

GOLDEN SPUR

Extra large; rich yellow flower, devoid of green midrib. A very strong grower, and unsurpassed either for pot or garden culture. First size bulbs, 7c. each, 18 cts. for 3, 60 cts. per doz., \$3.50 per 100, \$30 per 1,000; mammoth bulbs, 10 cts. each, 25 cts. for 3, 75 cts. per doz., \$5 per 100.

SIR WATKIN

Largest of the medium trumpet varieties; produces large, handsome flowers on long stems. Color, light yellow perianth with golden cup; easily grown and fine for pots. 7 cts. each, 15 cts. for 3, 50 cts. per doz., \$3 per 100.

SPECIAL OFFER 5.

We will mail three bulbs of each of above six varieties for 75 cents, postpaid.

SPECIAL OFFER 6.

We will send by express 50 bulbs of each of above six varieties for \$8, customer paying charges.

SPECIAL OFFER 7.

We will send by express 100 bulbs of each of above six varieties for \$15, customer paying charges.

NOTE.—Where not otherwise offered, we supply 25 bulb at the 100 rate and 250 bulbs at the 1,000 rate.

EMPRESS

(See illustration on front cover)

This makes a fitting companion to Emperor, and is, we think, the finest of the two-colored trumpet varieties. The trumpet is of a rich yellow, with a perianth of snow-white petals; flowers bold and erect. First size bulbs, 10 cts. each, 25 cts. for 3, 75 cts. per doz., \$4 per 100, \$35 per 1,000; mammoth bulbs, 15c. each, 35 cts. for 3, \$1 per doz., \$6 per 100.

HENRY IRVING

An extra fine variety, with broad, yellow, spreading perianth, petals overlapping each other; trumpet of rich golden yellow and very large. 7 cts. each, 15 cts. for 3, 50 cts. per doz., \$3 per 100, \$25 per 1,000.

MRS. LANGTRY

Belongs to same class as Sir Watkin, but has large broad white petals with white cups, which is beautifully edged with yellow. 7 cts. each, 15 cts. for 3, 50 cts. per doz., \$3 per 100.

VAUGHAN'S EXHIBITION TULIP BED

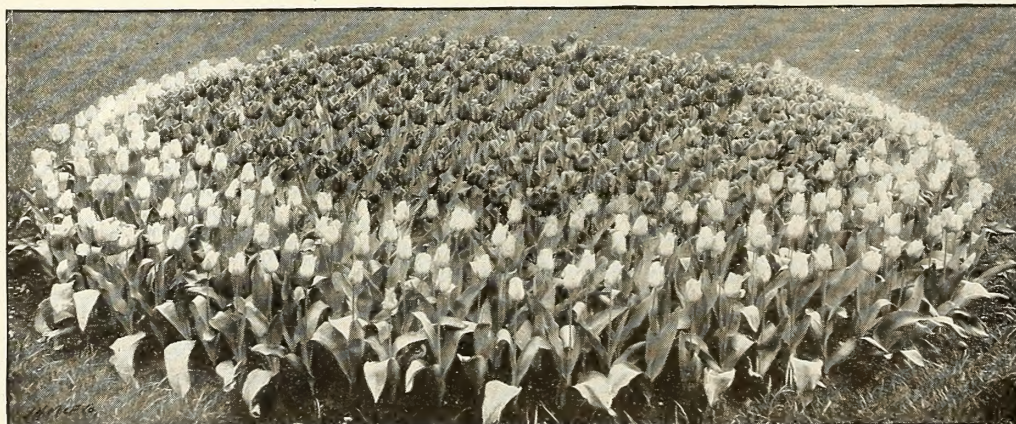

This beautiful bed, as illustrated below, is 30 feet in circumference and requires 685 bulbs planted 4 inches apart, the first four rows being filled with L'Immaculee, pure white, and the center rows with Belle Alliance, scarlet. As the L'Immaculee grows about two inches taller than the Belle Alliance, the bed should be raised toward the center. If this precaution is taken the effect will be very fine. Price, 685 bulbs—340 L'Immaculee, 345 Belle Alliance—for \$9; if Artus is substituted in place of Belle Alliance, prices will be \$6, by express at purchaser's expense.

VAUGHAN'S HARDY BORDER COLLECTION

We have selected varieties which will grow well in a border where other permanent plants are growing, blooming in succession during the early spring, when other flowers are scarce.

Price for 300 bulbs, \$3.25, by express, at purchaser's expense.

- 50 Grape Hyacinths.
- 25 Late-flowering Tulips, Gesneriana.
- 25 Darwin Tulips, Mixed.
- 50 Double Narcissus, Alba plena.
- 15 Double Narcissus, Orange Phoenix.
- 50 Single Narcissus, Princeps.
- 10 Hardy Lilies, Assorted.
- 50 Snowdrops, Single.

Winter and Spring Flowers

FOR INDOORS AND THE GARDEN

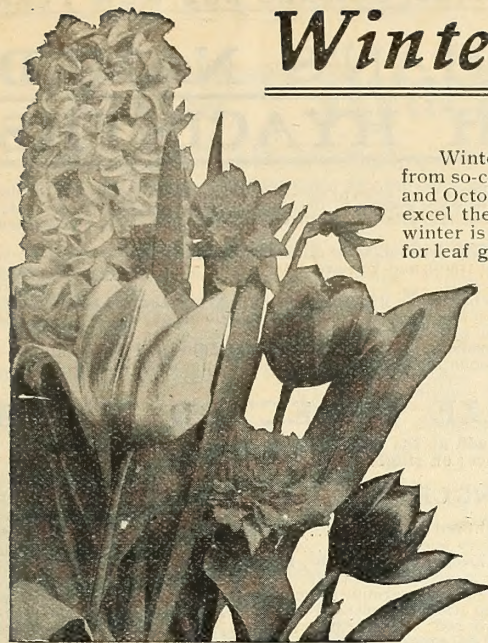

Winter flowers indoors and early spring flowers for the garden and lawn are grown from so-called "fall bulbs," and these should be secured and planted during September and October. A most interesting class of plants. In beauty and fragrance these often excel the choicest summer flowers. The contrast of this indoor garden with stormy winter is a constant pleasure. As these bulbs contain in themselves stored-up material for leaf growth and flowers, their cultivation needs little care.

Our importations of these bulbs and plants from Europe are made with special reference to the needs of private conservatories, commercial green-houses and others who desire the most reliable qualities obtainable, for those who produce the flowers for pleasure or for profit, rather than for selling the bulbs themselves. The bulbs we offer will, under proper treatment, produce the best flowers that grow. We strive with each new edition of this book to make plainer the use of these, and tell how beds and borders can best be laid out and planted. This makes easy a task formerly difficult. With the details we give here every customer should be able to select and order readily without the aid of a gardener, and therefore with an added pleasure to the final result.

Should you need further suggestions or plans, we shall be glad to supply them on receipt of some particulars from you regarding size of beds to be planted, effect desired, amount to be expended, etc.

Depth at Which Bulbs Should be Planted

Many of our customers are frequently puzzled to know the proper depth and distance apart at which bulbs should be planted. The accompanying diagram, reproduced from *Popular Gardening*, conveys the information much more clearly and briefly than we could describe it. The chart will bear careful study. **Outdoor planting should be done early** in the fall to secure healthy plants, vigorous foliage and beautiful flowers.

BUSINESS RULES—PLEASE READ CAREFULLY

How to Order. We do not send seeds, plants or bulbs C. O. D. Write your name, post office, state and express office plainly on every order and every time you write us. Give plain shipping directions; where none are given we use our best judgment, at your expense and risk.

Prepaid. Prices given in this Catalogue usually include prepayment by mail on bulbs and plants (not tools, unless so marked) except where offered "by express," or marked otherwise, then the purchaser is to pay charges.

Cost of Remitting. Our customers may select additional bulbs free, with every order of \$1 or more, to the amount of the cost of the money order, registered letter, or other remittance.

Very Important. You can aid us by using order sheet, as follows

1. Place the quantity wanted before each article.
2. Use one line for each kind ordered.
3. As nearly as possible make out your list in the same order in which the goods are catalogued, beginning at the front.

Prompt Delivery. If goods are not received in a reasonable time, send exact copy of order, date sent, stating amount of enclosure, kind of remittance (draft or money order), and the same will be investigated. Remember, sometimes in the busiest season others may have orders ahead of you, which must be filled in rotation. Order early.

Errors. If stock is not as expected, compare with order; read Catalogue rules carefully, and if we are in the wrong write us at once, giving all

particulars as in preceding paragraph, but please do not complain to others until we have had a chance to rectify or explain matters.

Time of Sending. Not all fall bulbs are ready at the same time, but nearly all the Dutch and French importations are in the store by September 15. The following table gives approximate dates of arrival:

I write you to tell you that I am well pleased with the "Vaughan's Top Root Hyacinth Bulbs" we received from you last fall. The flowers are very fine and I notice today that the individual flowers of the Hyacinth Schotel were over 2 inches in diameter. I certainly shall want some more this season. Also, your "Jumbo Von Sion" averages four to five flowers to each bulb. I will want quite a quantity of these the coming season.

PHILIP H. COX, Gardener to C. L. Bausher, Esq.

Vaughan's Netherlands or Top Root

During the harvesting of the Hyacinth bulbs in Holland it is found that a few varieties produce a limited quantity of what are known as "top-roots." Vaughan's "Fancy" Bedding and Forcing

Hyacinths

We import each year a grade of Mixed Hyacinths, for which we pay a high price; these bulbs equal in size the named varieties offered by many dealers, and are sure to give satisfaction to all who use them. We offer these bulbs in separate color mixtures, each shade being mixed from varieties which will bloom at the same time, making them very desirable for bedding purposes. For those who do not wish to pay the high price for named varieties, we especially recommend this grade for growing in pots. We offer this "Fancy" strain in single varieties only.

VAUGHAN'S EXHIBITION HYACINTH BED

The illustration represents an 8-foot (circumference) bed planted with 50 bulbs of L'Innocence Hyacinth, a beautiful variety, pure white in color and of large truss (see illustration on back cover page for size of flower). In order to overcome the somewhat stiff effect of the Hyacinth, Pansies have been planted between the bulbs and the result is certainly very fine. Such a bed as this will brighten up the lawn in early spring at a very small cost. In order to reproduce the same effect as shown in the illustration, we will supply only L'Innocence bulbs for this bed. We offer same in three sizes.

French Roman, or Christmas HYACINTHS

Prices on single bulbs are postpaid
Dozen lots, if wanted by mail, add 8 cents per dozen for postage

There are no more popular winter-blooming bulbs than **French Roman Hyacinths**, millions of them being grown each season, principally by florists for the cut-flower markets. They are certain to bloom in the house, and may easily be grown by the most inexperienced, in pots of soil or in water and pebbles—planted in September they flower at Christmas or sooner. A succession can be kept up by potting bulbs at intervals. Three bulbs can be planted in a 5-inch pot. Most bulbs throw up from three to five spikes of bloom, which do not all come to perfection at the same time, thus prolonging the flowering season. The flowers are dainty, graceful and delightfully fragrant. Since our importation of these exceed one-half million bulbs each season, we are able to select some extra fine stock for our customers. Each order should include at least a few of these bulbs.

White Italian Roman Hyacinths

This variety is later in flowering than the ordinary French Roman, and are therefore valuable for succession of bloom; very fragrant and free-blooming. 5c. each, 45 cts. per doz., \$3.50 per 100.

Special Offer B

One each of the above 6 varieties of Roman Hyacinths, 30 cts.; 3 each, 18 bulbs, 75 cts., postpaid.

Dutch Roman, or Miniature Hyacinths

These Hyacinths are excellent for growing in pots, pans or boxes, and coming into flower after the French Roman Hyacinths, they will give a continuous bloom if planted at the same time. They bloom very freely, the spikes being smaller than named Dutch Hyacinths, but equally fragrant and beautiful. For pot culture we recommend named varieties, but the mixed shades will also give good results.

GRAPE HYACINTHS

HARDY AS AN OAK
SPLENDID FOR NATURALIZING

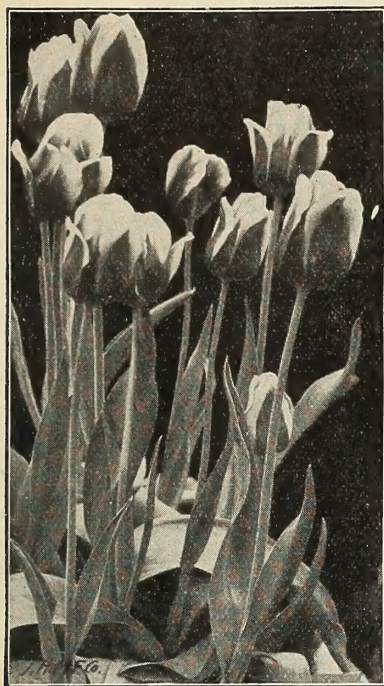

These exquisite little flowers are most fragrant and showy, and when planted in masses the effect is dazzling in the extreme. Once planted in the garden or lawn, they will soon multiply and send up flower-stems by the score each year. As a house plant they are of equal worth; planted six in a 5-inch pot and treated in the same way as Dutch Hyacinths, they will well repay all the care bestowed upon them.

Improved Blue. 5 cts. for 3, 15 cts. per doz., 75 cts. per 100, postpaid.

Snow-White. This is a beautiful companion to the above, and they make a striking show when planted together. 5 cts. for 2, 20 cts. per doz., \$1 per 100, postpaid.

Miniature Hyacinth, La Grandesse.

Keizerkroon.

KEIZERKROON

This splendid single bedding Tulip, which is illustrated on the upper corner of this page, may be well called the "Emperor's Crown." Of tall, erect habit, it grows to a height of 10 inches, and is most effective when grown alone in beds or masses. It has a large rich crimson flower with a broad margin of gold, making a combination which is dazzling in the extreme. Two hundred bulbs planted 5 inches apart are sufficient for a round bed 5 feet in diameter, thus making a display at the cost of \$3.50 which will last for weeks and attract the attention and admiration of every one who sees it. We import annually many thousands of this splendid variety and can assure our customers that they will receive nothing but large-sized, first-class bulbs. 5 cts. each, 12 cts. for 3, 35 cts. per doz., \$2 per 100, \$3.50 for 200, \$16 per 1,000.

Joost van Vondel.

Single Large-Flowering Tulips

The Tulip, for its gorgeous colors, its pretty cup-like shape and its early flowering, is one of the oldest spring favorites. Planted in beds or borders, it is unrivaled for brilliant effect. The number preceding the name of the variety denotes the height in inches, while the letters **a** and **b** indicate their earliness of bloom; the **a**'s flower together and are the earliest; the **b**'s flower together but are somewhat later.

Price for single bulbs includes postage; the dozen and 100 rates are by express at purchaser's expense. 25 bulbs at 100 rate; 250 bulbs at 1,000 rate. By mail, add 5 cts. per dozen for postage.

A splendid variety of about the same height and habit as Keizerkroon. The flowers are very large and long, color being a striking combination of cherry red, feathered with white. Owing to its long stiff, stem it makes a splendid cut-flower, lasting a long time in water. 4c. each, 10c. for 3, 35 cts. per doz., \$1.65 per 100, \$14 per 1,000.

VAUGHAN'S MAY-FLOWERING TULIPS

This section of the Tulip family deserves more attention. Being of great beauty and coming into bloom as they do, about "Decoration Day," a splendid succession of bloom can be had when planted along with the early Tulips listed on page 5. They are extremely hardy and are particularly fine for planting in clumps amongst shrubbery or in the herbaceous border. The flowers being borne on extra-long stems makes them invaluable as cut-flowers, and they have the added value of lasting a long time when cut and placed in water.

Bizarres. Yellow ground, feathered crimson, purple or white. 3 cts. each, 25 cts. per doz., \$1.25 per 100, \$10 per 1,000.

Bouton d'Or. The finest and deepest golden yellow Tulip. Splendid for cutting. Flowers are a handsome globe shape. 4 cts. each, 30c. per doz., \$1.40 per 100, \$12 per 1,000.

Byblooms, Violets. Tall and brilliantly variegated; white ground, flaked lilac-purple or black. 4 cts. each, 30c. per doz., \$1.50 per 100, \$13 per 1,000.

Scarlet Gesneriana.

This is a tall-growing, late-blooming Tulip, and undoubtedly one of the finest in cultivation. The flowers are as large as coffee cups and carried on stout stems nearly 18 inches from the ground. The color is brilliant crimson-scarlet, with a large, peacock-blue blotch in the center, and of very strong fragrance. No Tulip that has come under observation is at once so brilliant and lasting. They remain in bloom from three to four weeks, and are admirable when planted in groups among evergreens and shrubbery, where they show up to splendid advantage against the dark background. 3 cts. each, 25 cts. per doz., \$1.75 per 100, \$15 per 1,000.

Golden Crown.

Large yellow flowers, pointed petals, bordered with crimson. A splendid variety. 3 cts. each, 25 cts. per doz., \$1.25 per 100, \$10 per 1,000.

May-flowering Tulip, Scarlet Gesneriana.

Isabella. A beautiful variety with large, handsome flowers carried on long stems. Color of flower is primrose flushed rose, changing to a beautiful rose-carmine. 5 cts. each, 50 cts. per doz., \$2.50 per 100, \$20 per 1,000.

Maiden's Blush. A long-shaped flower; pure white, with beautifully recurved petals margined rose, borne on long, graceful stems. 5 cts. each, 50 cts. per doz., \$2.50 per 100, \$20 per 1,000.

Sweet Nancy. Pure white, margined and penciled on the edges with pink. 6 cts. each, 60 cts. per doz., \$3.50 per 100.

CHINESE SACRED LILY

ALSO CALLED "JOS FLOWER"

This is a species of Polyantha Narcissus introduced from China. The bulbs are of large size, measuring from 12 to 18 inches in circumference, and throw up five to ten flower-spikes, bearing clusters of large, perfect, waxy white blossoms, with yellow center; of a most delicious fragrance. These may be grown in pots, but are most successful when cultivated in the same manner as in China, namely, in water. In order to get best results it is advisable to cut two or three slits half an inch deep up and down the sides of the bulbs near the top; this enables the weak shoots to burst through the tough outer layer.

LARGE SELECTED BULBS. Price, 10 cts. each, 25 cts. for 3, 90 cts. per doz.; if to go by mail, add 3 cts. per bulb, or 35 cts. per doz., for postage. Original baskets containing 30 bulbs, \$1.90 per basket, by express or freight at purchaser's expense.

MAMMOTH BULBS. These are of very large size and will give better results than smaller bulbs. 20 cts. each, 55 cts. for 3, \$2 per doz. If to go by mail, add 5 cts. per bulb for postage.

GIANT "PAPER-WHITE" NARCISSUS

A BULB WHICH EVERY ONE SHOULD TRY

We recommend this splendid variety of Narcissus as giving better results when grown in water than any other bulb grown in this way, and we think a trial will convince our customers of the truth of this statement. Will give even better satisfaction than the Chinese Sacred Lily when grown in water, the flowers being larger and of a more pleasing color and fragrance. These bulbs are of mammoth size, which we import specially for florists' use, and they can be grown equally well in earth. Planted in this manner, we recommend putting six or eight bulbs in an 8-inch pan, which, if started by the end of September, will flower by Christmas. 7 cts. each, 25 cts. for 4, 65 cts. per doz., postpaid; \$4 per 100, not postpaid.

CHINESE LILY BOWL. The bowl is made of pressed glass, and is just the thing in which to grow Chinese Sacred, Giant Golden Sacred or Double Sacred Lily, and Giant Paper White Narcissus, in gravel and water. 6-inch, for one bulb, 25 cts. each, 60 cts. for 3; 7-inch, for two bulbs, 30 cts. each, 80 cts. for 3; 8-inch, for three bulbs, 35 cts. each, \$1 for 3. Can only be forwarded by express.

Gravel, such as is used for above. 10 cts. per qt.; if by mail, postpaid, 40 cts.

Chinese Sacred Lily.

GIANT GOLDEN SACRED LILY (JONQUIL RUGULOSUS)

As easily grown as the Chinese Sacred Lily, and a most beautiful companion to that well-known and popular plant. Flower is of handsomest glowing yellow, and very fragrant. Giant "Paper White" Narcissus.

Allium Neapolitanum

This is one of the most beautiful bulbous plants for conservatory, house or window-garden. Like the freesia, it is of easiest culture, and can be grown by any one. The flowers are star-shaped, and are produced in large, loosely spreading umbels, on stems 20 inches high.

Plant four bulbs in a 5-inch pot as early as received in the fall, and they will immediately commence to grow, flowering in January and continuing in bloom for several weeks. 5 cts. for 2, 20 cts. per doz., \$1.25 per 100, \$2 for 250, \$3.50 for 500, postpaid.

Amaryllis

This is an old favorite and certainly deserves to be in every garden. Once planted where it is to remain, it will come up each spring and make a beautiful plant, with elegant green foliage and long, drooping racemes of heart-shaped pink and white flowers. They also make splendid pot-plants if potted in November and set away in a cool cellar until pot is full of roots; they can be brought into flower in six weeks and will last for some time. 15 cts. each, 25 cts. for 2, postpaid; \$1.25 per doz., \$9 per 100, by express at purchaser's expense.

Chionodoxa Lucillae

(Glory of the Snow)

These bulbs are becoming very popular, and deservedly so, for their lovely blue and white flowers are seen in the garden among the earliest of spring flowers. The graceful sprays are admirable for all sorts of bouquets and cut-flower work of every kind, such soft blue shades being always desirable and hard to find in other flowers. The bulbs are perfectly hardy. Once planted they can be left to themselves, coming up each year at the first sign of spring. For window culture they are fully as charming as freesias; they bloom very early, usually by Christmas. **Selected bulbs,** 3 cts. each, 25c. per doz., \$1.25 per 100, \$10 per 1,000, postpaid.

Crown Imperial

An old-time garden favorite, with clusters of large, bell-shaped flowers. Once planted it will grow and increase from year to year. Plant as early as possible, and about 5 inches deep. 15 cts. each, 30 cts. for 3, \$1.15 per doz., postpaid.

Giant-Flowered Cyclamen.

Cyclamen

GIANT-FLOWERED

This well-known, free-blooming plant is only adapted for house culture in our climate, but for winter flowering it has few superiors. Plant in September or October in a 5-inch pot, using rich, light soil, and water sparingly until it begins vigorous growth, after which it may be treated like other house plants. Will give more flowers with less trouble than almost any other bulb we list.

Pure White **Crimson**
White, Carmine Eye **Rose, with Dark Eye**
Any of above varieties, 15 cts. each, 40 cts. for 3, 75 cts. for 6, \$1.25 per doz., postpaid.

Mixed Varieties. 12 cts. each, 30 cts. for 3, 50 cts. for 6, 85 cts. per doz., postpaid.

GIANT ORCHID-FLOWERED

Vaughan's White Calla.

Vaughan's White Calla

This general favorite is one of the easiest bulbs to grow, and gives excellent results with very little care or attention. We make special arrangements with growers in California for these bulbs, having whole fields grown for us each year, and as a result we are able to select the best bulbs only for our retail trade. We recommend planting the large-sized bulbs, as they will give much better results both in number of flowers and strength of growth. After the plant has flowered and the leaves have died down it can be allowed to dry up and restarted in September of the following year by simply repotting in fresh soil.

First size. 15 cts. each, 40 cts. for 3, postpaid; \$1.25 per doz., \$4.50 for 50, \$8 per 100, by express at buyer's expense.

Select size. 25 cts. each, 60 cts. for 3, postpaid; \$2 per doz., \$7 for 50, \$12 per 100, by express at buyer's expense.

Mammoth, or Jumbo size. 40 cts. each, \$1 for 3, postpaid.

VAUGHAN'S NEW PROLIFIC CALLA

This Lily we have been growing for several years, starting from a few plants. There is no question but that it will take the place of the common Calla Lily wherever it is seen. The flower is large, perfect in shape and of snowy whiteness, much purer than the common one. Freedom of bloom is its great value, producing two or three times more than any other, as seen on photograph cuts. The plant is a trifle shorter and a very handsome, compact grower. It forms a great mass of fibrous roots which run down a foot or more into the soil. No doubt this strong root-growth causes its abundant bloom. It is exceedingly useful in the South and West, where Callas grow naturally in the open air. 50 cts. each, \$1.35 for 3, \$5 per doz.

BLACK CALLA. A peculiarity of this bulb from the Holy Land is that it is strictly a winter bloomer, producing enormous coal-black flowers of a brilliancy that is indeed striking. Bulbs should be potted as soon as received and set away in a dark, cool place until they have made root-growth, when they can be taken to the light. Large bulbs, 15 cts. each, 50 cts. for 4; mammoth bulbs, 20 cts. each, 75 cts. for 4.

SPOTTED-LEAF CALLA

This variety is similar to the well-known White Calla, but has glossy dark green foliage, beautifully spotted with white, making it a splendid ornamental plant even when not in bloom. The flowers are pure white with a dark throat; it makes an exceedingly valuable decorative plant when bedded out in summer. 15 cts. each, 25 cts. for 2, \$1.25 per doz.; extra large bulbs, 25 cts. each, 60 cts. for 3, postpaid.

Large-Flowering Crocus

PERFECTLY HARDY

One of the earliest flowers to open in spring, the Crocus makes a very effective show when planted in masses or where three or four rows are arranged in a border. They are perfectly hardy and can be left in the ground for several years without being disturbed. An effective method of planting is to scatter them over the lawn by digging up a small piece of sod and placing one or two bulbs in each spot. This gives a pretty effect in early spring, and the tops can be cut along with the grass safely when first mowing is made. Also useful for pot culture, but care should be taken not to keep bulbs too warm after planting.

Prices quoted below for Crocus include postage on dozen and 100 lots. The 1,000 rate is by express at purchaser's expense. We supply 25 at the 100 rate and 250 at the 1,000 rate.

PRIDE OF HOLLAND CROCUS. We have offered in previous years a strain of yellow Crocus under the name of "Holland's Pride," and have this year succeeded in securing the same strain in other colors. The bulbs are of enormous size, being about the size of a silver dollar, and will each throw a number of large flowers, making them the most showy Crocus we have ever had the pleasure of seeing. We offer these in five shades.

Sir Walter Scott (white, blue striped); **King of Blues** (fine blue), **Purpurea grandiflora** (dark purple), **Queen Victoria** (pure white), **Mammoth Yellow.**

YELLOW CALLA, MRS. ROOSEVELT

A result of cross between one of the rare yellow Callas and the well-known spotted-leaved variety. It retains all the vigor of the white-flowered variety and has a beautiful yellow flower of a soft primrose-yellow equal in size to any yellow Calla now in existence. The foliage is beautifully spotted with pure white, making it a fine plant for bedding purposes, and the flowers are borne on stout stems. Its vigorous growth makes it decidedly the best yellow variety to date, and our customers ought to make a trial of a few bulbs at least. 30c. each, 3 for 85 cts., \$3.25 per doz., \$25 per 100.

Of all winter-blooming bulbs none are more easy of culture or more beautiful and graceful than the Freesia. Plant six to eight bulbs in a 5-inch pot, and you will get a plant which will beautify and perfume the house for weeks. They force easily and can be had in bloom for Christmas if desired; by plunging six or eight pots in a coldframe they can be brought in at intervals, in this way making a continuous display. The flowers are splendid for cutting.

Petals are reflexed, making the flowers star-shaped. A very pleasing improvement on the ordinary Freesia, and a welcome addition to the list of bulbs for indoor culture. 5 cts. each, 12 cts. for 3, 35 cts. per doz., \$2.50 per 100, postpaid.

IRIS

The Iris, or Fleur-de-lis, is one of the most beautiful hardy garden plants grown. There are several distinct varieties of these, natives of different countries, and each represents many different kinds suitable for garden culture. The flowers are of peculiar formation and greatly resemble orchids. Most varieties we offer are suitable for culture in the open garden.

SPANISH IRIS (*Iris Hispanica*).

One of the most satisfactory varieties of Iris to grow, being very hardy, and equally good for pot or garden culture. The flowers are of great beauty, having many different blend-ings of color, and if cut when in the bud state will last a long time in water. For best effect they should be planted in clumps or masses of 25 or more bulbs set 3 inches apart each way. When planted in pots and grown out of doors in the coldframe they can be brought in when growth is well advanced, and will flower late in March or early April.

Belle Chinoise (yellow),

Lilium Candidum The Finest Hardy Lily that Grows

MADONNA, or ANNUNCIATION LILY

This is one of the oldest, loveliest and best-known Lilies. The flowers, of which there are three to twenty on each stem, are snow-white, with heavy yellow stamens and of the most delightful fragrance. It is hardy, and will thrive in any ordinary garden soil, preferring a position where it can get plenty of light and air. Blooms in the open ground about June 20. We recommend early planting of this Lily, as it makes its leaf-growth in fall, and thus prepares itself for early blooming. Orders should therefore be sent in on receipt of this Catalogue. The bulbs which we offer are of an improved type over those usually sold, the flowers being larger and the petals thicker, which makes it more lasting. Once planted they should not be disturbed for years, and customers will do well to plant a bed of 25 or more.

Selected Bulbs, 10 cts. each, 27 cts. for 3, \$1 per doz., postpaid; by express, 85 cts. per doz., \$1.75 for 25, \$6.50 per 100, \$14 for 250. **Mammoth bulbs**, 25 cts. each, 70 cts. for 3, postpaid; by express, 20 cts. each, 50 cts. for 3, \$1.50 per doz., \$10 per 100. **Jumbo bulbs**, 50 cts. each, \$5 per doz., by express.

LILIAM LONGIFLORUM

A variety bearing in clusters beautiful snow-white trumpet-shaped flowers of rare fragrance, almost exactly like *Lilium Harrisii* in shape, but blooms later, extending the season of that beautiful kind. This is also a splendid variety for outdoor planting, being very hardy, and should be planted along with *Candidum*, as it comes into bloom about July 10, just when *Candidum* has finished.

Extra Size Bulbs, 15 cts. each, 40 cts. for 3, \$1.25 per doz., postpaid; by express, \$1 per doz., \$2 for 25, \$7 per 100. **Mammoth bulbs**, 30 cts. each, 80 cts. for 3, \$3 per doz., postpaid; by express, \$2.50 per doz., \$4.50 for 25, \$15 per 100.

If wanted by mail, add 10 cts. each for postage.

HARDY GARDEN LILIES

The favorite flower of every one who takes an interest in his garden, and who wishes to have a succession of bloom in the herbaceous border or beds. Lilies can be successfully planted amongst shrubbery, where they take up little or no room, and if properly chosen with regard to their time of flowering, a constant show can be had for the better part of the summer. To obtain good success, bulbs should be planted whenever received in the fall.

Just a few lines to let you know that the collection of assorted colors single Hyacinth Bulbs that I got of you several years ago are still doing fine. They are in bloom in the open garden at present writing, and must say that they are the finest I have ever seen. Have just measured one of the light blue ones and the blossom is 2 inches across. One of the pink ones has six flower-spikes from a single bulb. Last year one of them had six flower-spikes and at least a third of the bulbs had two, three, four and five flower-spikes. The bulbs were the largest I have ever seen, being about 3 inches in diameter. Am so well pleased with them that I think I'll have to get some more white and cream-colored ones this next fall.—L. S. WRIGHT, Portland, Oregon.

LILIAM HARRISII

TRUE BERMUDA EASTER LILY

Indispensable for early forcing. We secure our entire supply of these bulbs from one concern, who for the past few years have been working up a stock of what we consider to be the old original *Lilium Harrisii*. In addition to this we will supervise the packing and shipping of the crop through our own representative, thus insuring careful grading and preventing mixture of objectionable types.

This mammoth white Trumpet Lily, with flowers 4 to 5 inches long, is the best of all Lilies for winter forcing and flowering, because its grand trumpet-shaped flowers, which give forth a delicious perfume, are wonderfully beautiful and expressive. For blooming at Christmas it is best to order bulbs as soon as you receive this Catalogue. Our importations this season will amount to nearly half a million bulbs, and we are happy to say that a better lot of bulbs we have never offered. The immense quantity we handle enables us to obtain the finest bulbs for our retail trade and to offer them at lowest prices.

HARDY JAPAN LILIES

These are among the most beautiful of all hardy Lilies. Owing to their late arrival (middle of November) it is sometimes inconvenient to plant them, as the ground is frozen. This, however, can be easily overcome by covering the ground where the bulbs are to be planted with some loose leaves or manure, and this slight trouble will be fully repaid when the flowering season comes around.

NOTE OUR REDUCED PRICES

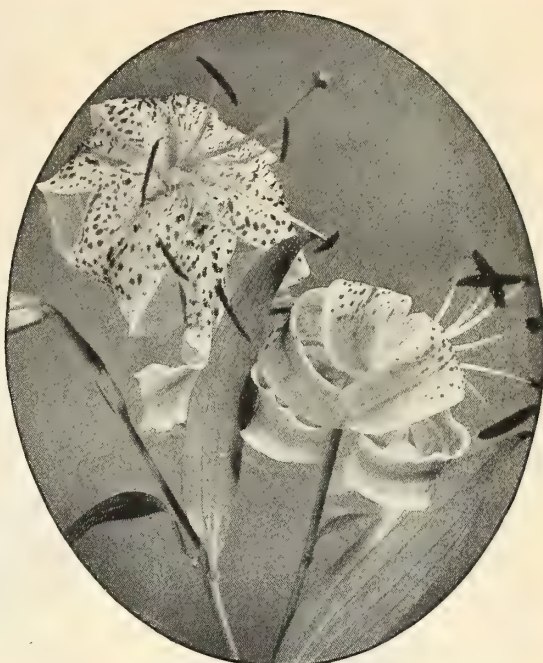

The price of single bulbs and lots of 3 include postage; the dozen, 25 and 100 prices are by express at purchaser's expense

CRIMSON RAMBLER.

We consider this the most wonderful of all the new Roses. We have had this summer branches 7 feet long, loaded down with large clusters of these brilliant red Roses. One would hardly believe it possible that so many could be produced on one shoot. A superb climber, cannot be excelled, while it is also magnificent in bush form. One of the striking characteristics of this Rose is its remarkable color, which is of the brightest crimson and remains so to the end. The flowers with which the plant is covered are produced in large trusses of pyramidal form carrying thirty to forty flowers, which remain on the plant a long time. The foliage is bright green and glossy, and contrasts finely with the bright crimson of the Rose. The plant seems to be as hardy as the old *Prairie Queen*. Every garden should contain this grand Rose.

THE PHILADELPHIA RAMBLER.

It differs from the *Crimson Rambler* in two important particulars. First, the color is brighter, deeper and more intense. Second, the flowers are perfectly double to the center. It is a strong, healthy grower, and a free and abundant bloomer. Two-year-old plants, each 60 cts., doz. \$6.

DOROTHY PERKINS.

New Pink Rambler Rose. A good one. As hardy as *Crimson Rambler* and same habit of growth. The flowers are about 1½ inches across; are borne in clusters of from ten to thirty, and are very double; the petals are very prettily rolled back and crinkled. The color is a most beautiful shell-pink, and holds a long time without fading. Young pot-plants, by mail, each 20 cts., 4 for 60 cts. doz. \$1.50. Strong 2-year-old plants, by express, each 50 cts., 3 for \$1.25.

THE NEW ROSE BABY RAMBLER

The Everblooming Dwarf Crimson Rambler

This new Rose, which was sent out by the name of Mme. Norbert Levavasseur, is a cross between *Crimson Rambler* and *Glory of Polyanthas*, retaining the color of the former with the exceedingly free-flowering habit of the latter, as well as its dwarf growth. The plants are very vigorous, growing to a height of about 24 inches. The foliage is dark, glossy, profuse and remarkably free from insects and fungus. The flowers are borne in clusters, 30, 40 and 50 flowers to a cluster. They are in every way just like those of the *Climbing Crimson Rambler* and are produced perpetually. We have closely watched this new Rose in our greenhouses since November, 1903, and they have never been without flowers from that time until the present day. We had a large bed in our grounds at Western Springs and there the plants were constantly in bloom until November—even in the hottest weather. This is a remarkable record. We have grown thousands of varieties of Roses but have never met one that possessed all these remarkable qualities combined. It is the Rose for hedging out. No garden, no matter how small or large, should be without it. There is no Rose in existence that equals it in freedom of bloom and perpetual blooming qualities.

Egyptian Winter Onions.

ONION SETS

Egyptian, or Winter. This variety never forms a large bulb; their value lies wholly in their special adaptability for producing green onions for spring use; are immensely productive and perfectly hardy. Being perennial, they will, if left in the ground, continue growing for an indefinite time, continuing to increase from the bottom and form sets produced on top of the stalk. In their culture the sets should be planted in the fall, as they thus gain the benefit of prolonged growth, and attain a larger size. Plant in drills to a depth of 3 to 4 inches, to bleach the ensuing growth to some length. Price for fall delivery, pt. 15 cts., qt. 25 cts., 2 qts. 45 cts., postpaid; by express, at purchaser's expense, pk. 50 cts., 1/2 bus. \$1, bus. (28 lbs.) \$1.75, bbl. (3 1/2 bus.) \$5.60.

Pkt. 10 cts., oz. 15c., 1/4 lb. 30c., lb. \$1, postpaid.

Improved Early Scarlet Globe. Vaughan's Selected Stock. A desirable turnip sort for hot-bed forcing and outdoors; very early; flavor mild, crisp, juicy and tender; top small; will stand heat without becoming pithy. Is ready in twenty-eight days. Pkt. 5 cts., oz. 10 cts., 1/4 lb. 25 cts., lb. 90 cts.

VAUGHAN'S "20-DAY" RADISH, the quickest of all Red Radishes. Quick growth is one of the main essentials for a crisp and tender Radish. This matures in twenty days after sowing, which makes it one of the most valuable sorts for forcing or outdoor culture. The flesh is pure white, crisp and of a very pleasant flavor; the skin is a most attractive bright scarlet. The leaves are very short, which admits of very close sowing. Pkt. 5 cts., oz. 10 cts., 2 ozs. 15 cts., 1/4 lb. 25 cts., lb. 75 cts.

Vaughan's "Chicago Parks" Lawn Seed

The very best lawns in the United States are produced from our **Lawn Grass Mixtures**. The "Chicago Parks" Lawn Grass seed mixture originally planned for use in our famous city parks, has been sold at our stores for many years with very general satisfaction. Only those grasses of lasting value and hardness which, once established, need no reseeding for years, are contained in this mixture. Every grass used is as pure as can be found anywhere, our cost being of secondary consideration when purchasing. Careful cleaning of the best varieties makes this mixture as free as it is possible to make it from foreign matter. If to go by mail, add 8 cents per pound for postage.

VAUGHAN'S LAWN FERTILIZER

HIGHEST CHEMICAL ANALYSIS

Lawn grass is a voracious feeder and will not thrive and hold its beautiful dark green color and velvety appearance, unless it receives a sufficient supply of suitable food. Because few appreciate this fact is the reason there are so many poor, rusty-looking lawns. Stable manure is unpleasant to handle, ill-looking and decidedly odorous, and is also full of waste material. It contains weed seeds, which are obnoxious, and it often takes years to eradicate the weeds, causing an unnecessary amount of labor. All these objections are obviated by the use of our **Lawn Fertilizer and Vaughan's Lawn Seed**.
